

## Michael Horne joins Eurofins | mgt

### Business Development Manager - Queensland

**Eurofins | mgt is delighted to announce the appointment of Michael Horne as our Queensland Business Development Manager based in our Brisbane Laboratory.**

Michael joins us with many years' experience working in Business Development in the Australian Environmental Laboratory market specialising in Mining Environmental Contracts, Contaminated Land, Air and Water Monitoring contracts.

He has previously worked building high trust relationships with key decision makers and stakeholders across Australia and Asia Pacific working closely with Environmental clients on their water, soil and air quality monitoring programs.

We are delighted to have a person of Michaels experience join our operations to build on our current market position across Queensland and push further into the Mining operations market across Australia and Asia.

Michael is educated with a Bachelor & Master of Science from James Cook University and is currently studying his MBA.

Jonathon Angell moves from his current Business Development role to our Queensland State Manager and will manage all of our operations across Queensland in addition to the construction of our new Laboratory in Brisbane over the next 12 months.

**Sefton McGraw**, our Managing Director in Australia said:

*"With Michaels appointment Eurofins now has a truly dedicated National Business Development Team with an on the ground presence in every major Capital City in Australia, allowing us to work directly with our clients on their future project needs.*

*We have a great 2016 in front of us, with new Laboratories being built in Brisbane and Perth. The addition to our Business Development Team in each of these States will help build additional workloads as capacity opens up for increased analysis that these new laboratories will provide to our clients later in 2016.*

*With ever improving and Industry leading Quality & TAT we are building a Business Development Team that can best introduce our services to clients across new and expanding markets."*
